Evolutionary Theory - Quia

Evolution is the process of biological change by which descendants come to differ from their ancestors. This concept had been discussed for more than 100 years when Darwin proposed his theory of the way evolution works. Today, evolution is a central theme in all fields of biology. The 1700s were a time of great advances in intellectual thought.

CorrectionKey=A DO NOT EDIT--Changes must be made through ...

Jean Baptiste de Lamarck - types of organisms change over time & new types of organisms are modified descendants of older types. To explain how species change, Lamarck incorrectly hypothesized that traits were acquired through an organism's experience or behavior and were passed on to its offspring.
