We exploit quantum mechanical superposition and entanglement to manipulate information in ways not allowed in the classical world, and to study the interactions of atoms and photons at the single-particle level. We are a new experimental ultracold atom group in the Oxford Physics department at the Clarendon Laboratory.

Quantum Optics by Mark Fox (ebook)

It is not an introduction to optics; Lipson's beautiful clear book on optics is maybe the best way to get ready for this, and Mandl and Shaw's book on quantum field theory is an excellent empirically-oriented start to that subject.
